
Application Development for Mobile Computer

<Week 7 (Lab)>

Youn Kyu Lee

Warm-up

```
package com.example.camera

import android.Manifest
import android.content.Intent
import android.os.Bundle
import android.provider.MediaStore
import android.widget.Toast
import androidx.activity.ComponentActivity
import androidx.activity.compose.setContent
import androidx.activity.enableEdgeToEdge
import androidx.activity.result.contract.ActivityResultContracts
import androidx.compose.foundation.layout.*
import androidx.compose.material3.*
import androidx.compose.runtime.*
import androidx.compose.ui.Alignment
import androidx.compose.ui.Modifier
import androidx.compose.ui.tooling.preview.Preview
import com.example.camera.ui.theme.CAMERATHeme

class MainActivity : ComponentActivity() {

    private val requestPermissionLauncher =
        registerForActivityResult(ActivityResultContracts.RequestPermission()) { granted
            ->
            if (granted) {
                openCamera()
            } else {
                Toast.makeText(this, "Camera permission denied",
                    Toast.LENGTH_SHORT).show()
            }
        }
}
```

```
override fun onCreate(savedInstanceState: Bundle?) {
    super.onCreate(savedInstanceState)
    enableEdgeToEdge()
    setContent {
        CAMERATHeme {
            Scaffold(
                modifier = Modifier.fillMaxSize(),
            ) { innerPadding ->
                CameraScreen(
                    modifier = Modifier.padding(innerPadding),
                    onOpenCamera = {
                        requestPermissionLauncher.launch(Manifest.permission.CAMERA)
                    }
                )
            }
        }
    }
}
```

2

```
private fun openCamera() {
    val intent = Intent(MediaStore.ACTION_IMAGE_CAPTURE)
    try {
        startActivity(intent)
    } catch (e: Exception) {
        Toast.makeText(this, "No camera app found",
            Toast.LENGTH_SHORT).show()
    }
}

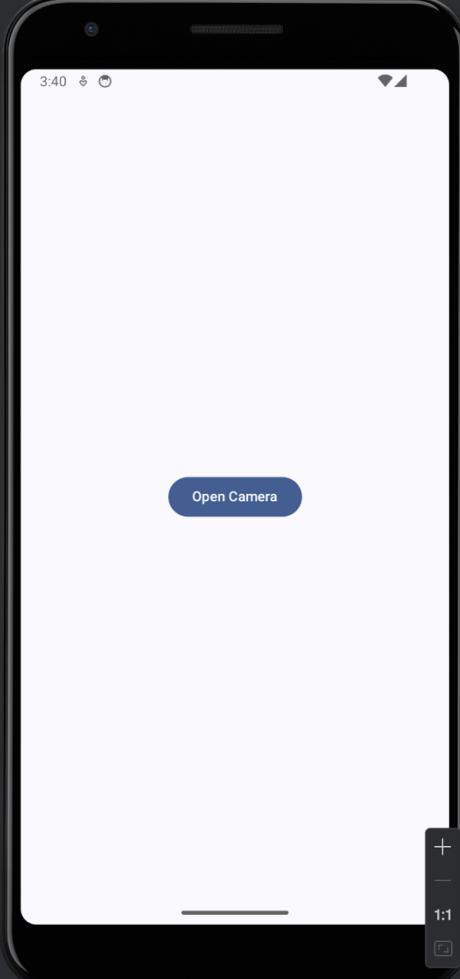

@Composable
fun CameraScreen(modifier: Modifier = Modifier, onOpenCamera: () -> Unit) {
    Box(
        modifier = modifier.fillMaxSize(),
        contentAlignment = Alignment.Center
    ) {
        Button(onClick = onOpenCamera) {
            Text("Open Camera")
        }
    }
}
```

1

```
@Preview(showBackground = true)
@Composable
fun PreviewCameraScreen() {
    CAMERATHeme {
        CameraScreen {}
    }
}
```

4

Warm-up

The screenshot shows an Android application running on a Pixel 3a XL API 34 emulator. The main screen displays a camera interface with a large blue 'Open Camera' button at the bottom left. The top of the screen shows the device's status bar with the time '3:40' and various icons.

MainActivity.kt **AndroidManifest.xml**

```
<?xml version="1.0" encoding="utf-8"?>
<manifest xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools">
    <uses-feature
        android:name="android.hardware.camera"
        android:required="false" />
    <uses-permission android:name="android.permission.CAMERA" />
    <application
        android:allowBackup="true"
        android:dataExtractionRules="@xml/data_extraction_rules"
        android:fullBackupContent="true"
        android:icon="@mipmap/ic_launcher"
        android:label="CAMERA"
        android:roundIcon="@mipmap/ic_launcher_round"
        android:supportsRtl="true"
        android:theme="@style/Theme.CAMERA">
        <activity
            android:name=".MainActivity"
            android:exported="true"
            android:label="CAMERA"
            android:theme="@style/Theme.CAMERA">
            <intent-filter>
                <action android:name="android.intent.action.MAIN" />
                <category android:name="android.intent.category.LAUNCHER" />
            </intent-filter>
        
    
</manifest>
```

The code in the `AndroidManifest.xml` file is highlighted with a red box. It includes declarations for camera usage and permission:

- `<uses-feature android:name="android.hardware.camera" android:required="false" />`
- `<uses-permission android:name="android.permission.CAMERA" />`

A larger red box highlights the following specific permissions and features:

- `<uses-feature android:name="android.hardware.camera" android:required="false" />`
- `<uses-permission android:name="android.permission.CAMERA" />`

Assignment#7

■ Task

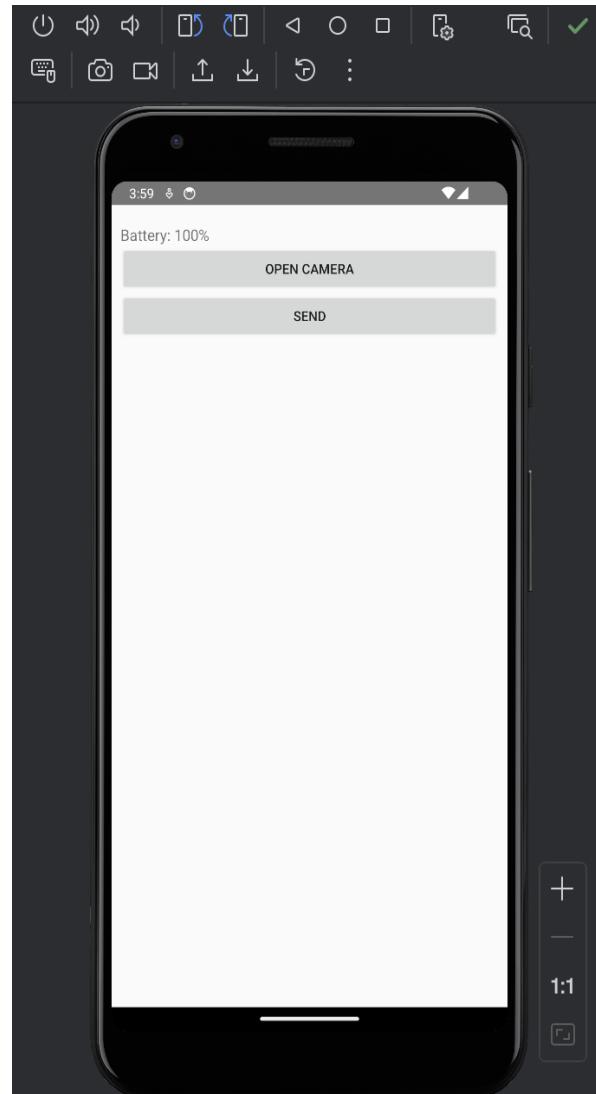

- Create a simple app using Android Studio.
- MainActivity
 - Display the current battery percentage at the top of the screen.
 - Include two buttons:
 - OPEN CAMERA: Requests camera permission and opens the device camera when permission is granted.
 - SEND: Sends the current battery percentage to SecondActivity using an Intent.
- SecondActivity
 - Receives the battery percentage value from MainActivity.
 - Displays the received battery level as plain text.
- Take screenshots of the emulator showing the results (refer to the samples on the next pages).
- Submit the final APK file together with the screenshots.

■ Submission

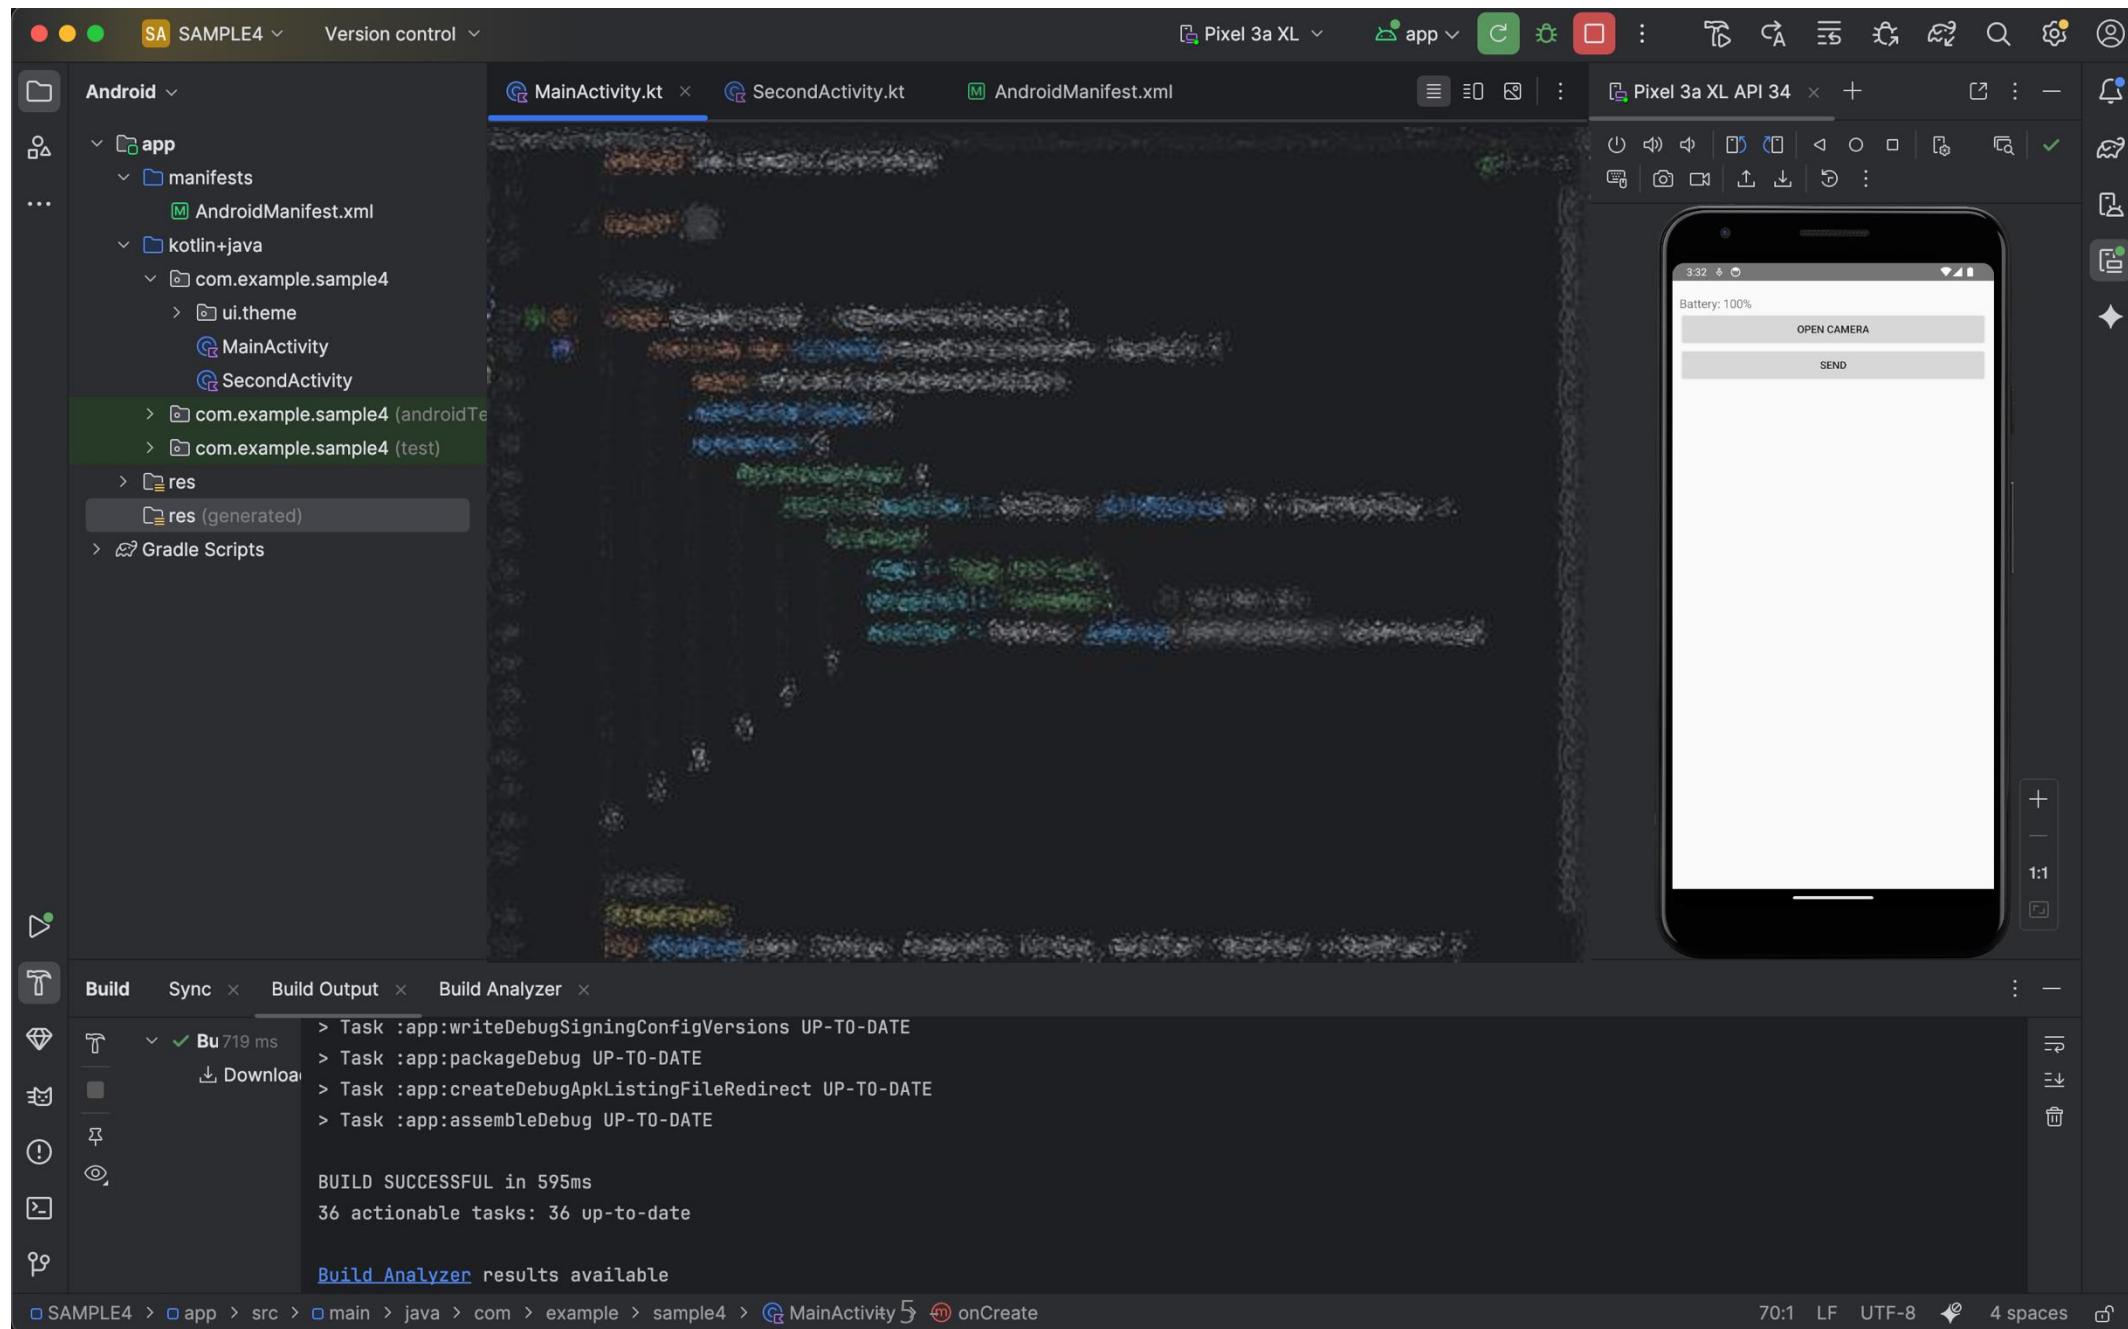

- “[Three](#)” Emulator screenshots (e.g., [Lab7_StudentID.png](#))
- [APK file](#) (e.g., [Lab7_StudentID.apk](#))

■ How to Submit

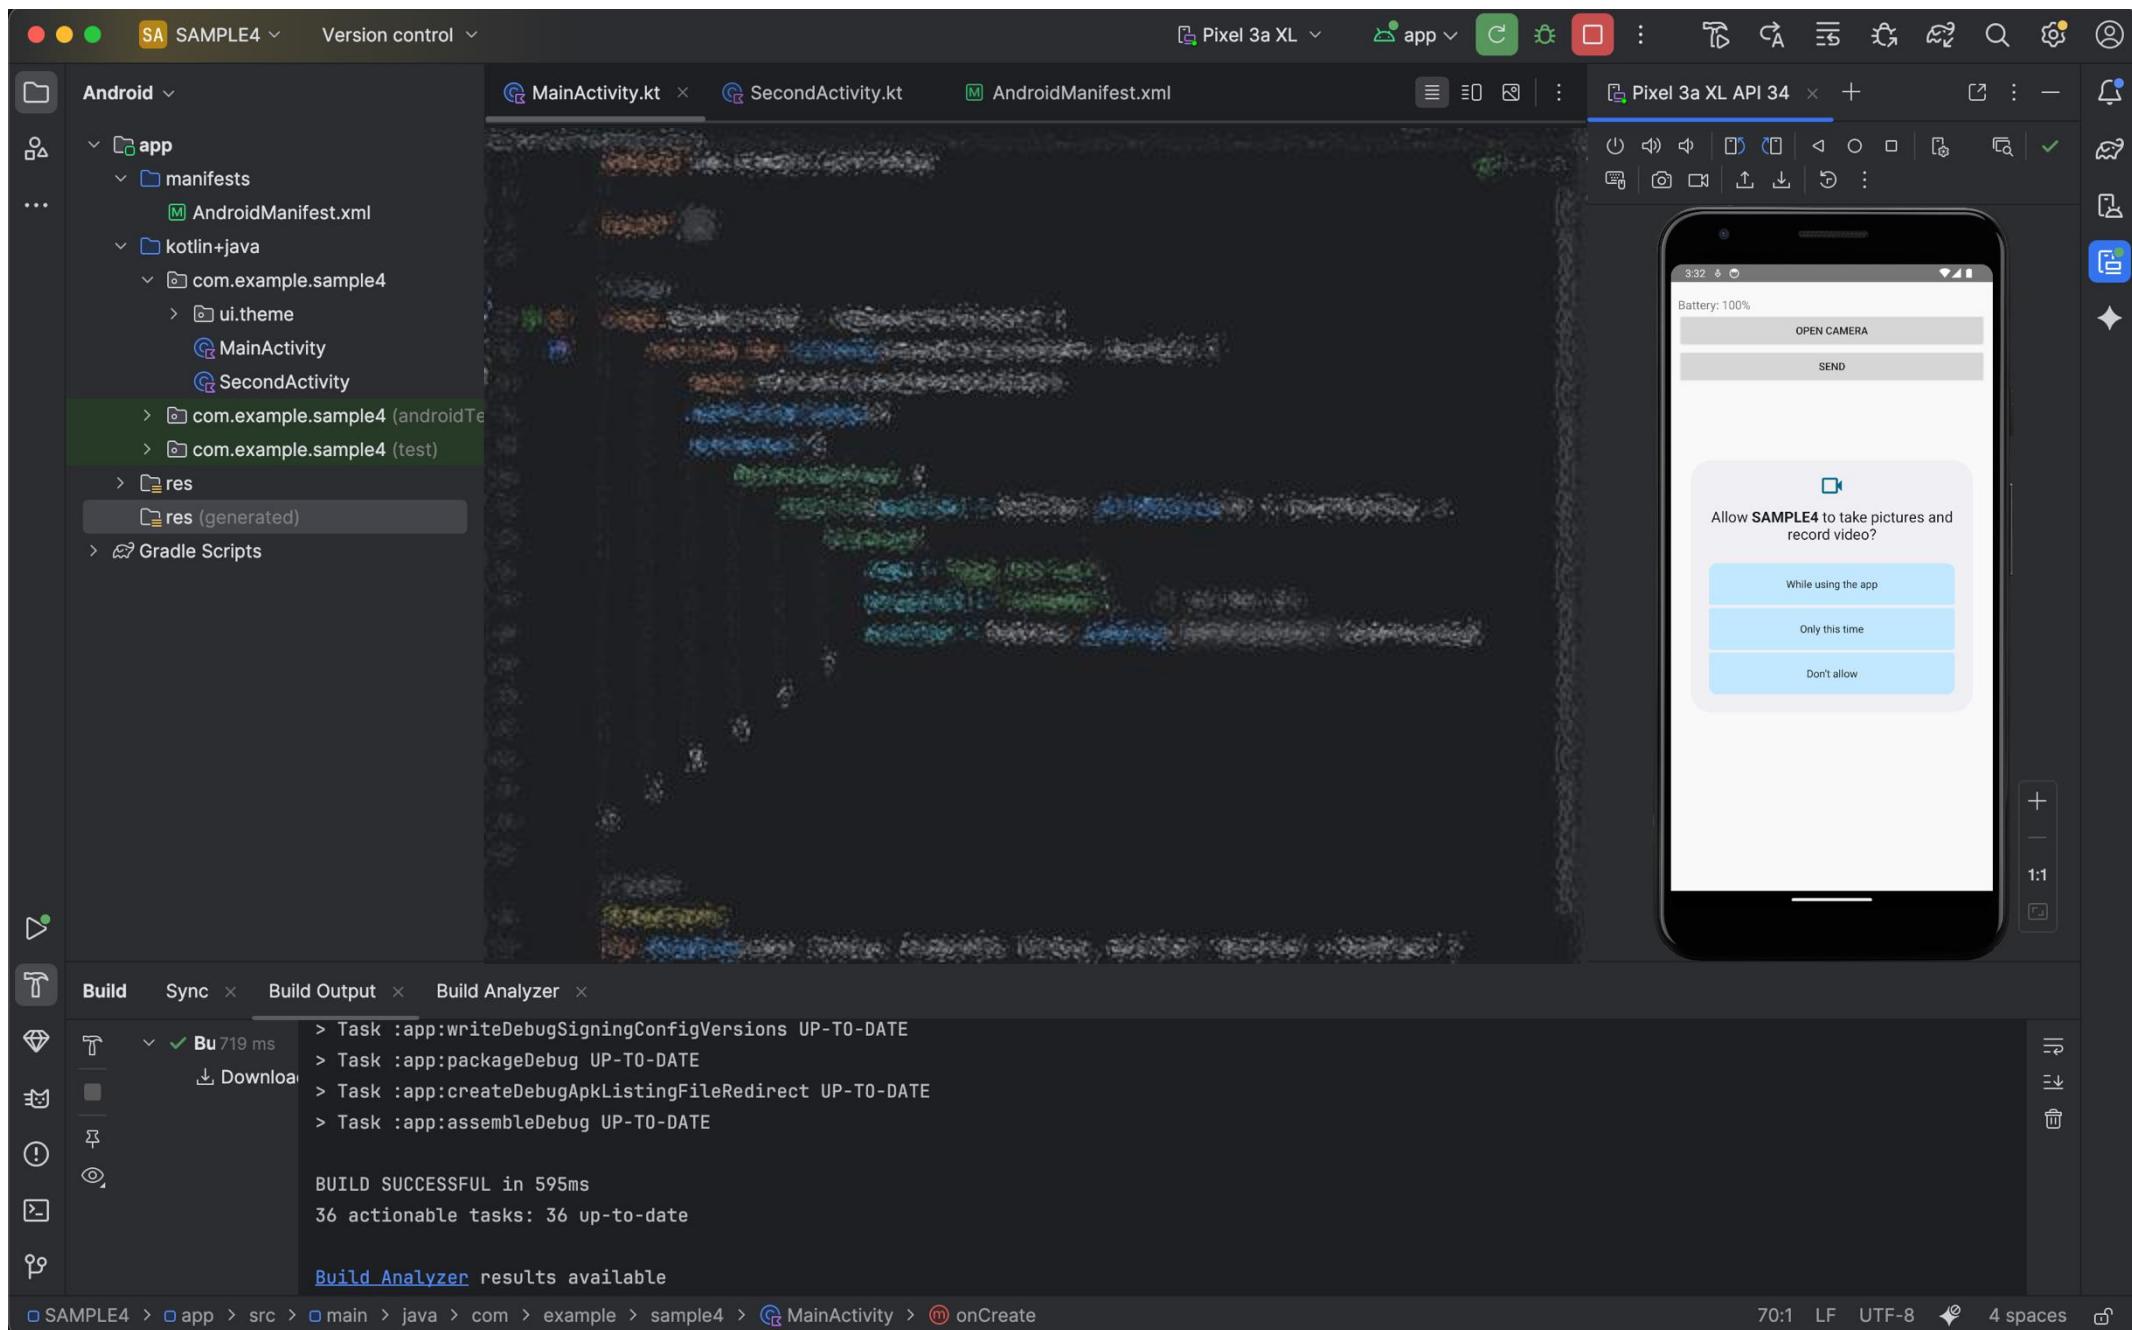

- Upload both the screenshot and APK file to e-class
- Deadline: 25.11.09
